

## Inteck can help your organization in the following areas:

- Optimization and Enhancement
- Assessment and Evaluation
- Strategic and Tactical IT Planning
- System Implementation
- Facility Management and Outsourcing
- Financial Management Services
- Electronic Medical Record
- Technology Services
- MEDITECH Specific Services

Inteck has built a reputation on successfully addressing IT problems; it is, therefore, most proud of its intelligent and innovative problem-solving skills. Rather than provide cookie cutter answers, Inteck designs solutions that conform to its clients' unique needs. The process is simple. Inteck sits down with a client to spend the time necessary to understand the organization's broad vision and strategic plans before it considers what IT resources and systems might be needed. By applying the most appropriate IT resources to its clients' unique challenges, Inteck's team invariably arrives at the ideal and most cost-effective solutions.

Why Inteck? If you answer "yes" to any of the following questions, Inteck might be able to help you:

- Do you feel you're not getting the most out of your current information system (IS)?
- Do you have an Electronic Medical Record (EMR) initiative?
- Are you sure your IT strategy supports your organization's vision?
- Is it difficult to obtain the right people to support your IT operations?
- Is your IT operations a part of your core business competencies?

### Optimization and Enhancement

Hospitals spend millions of dollars on technology, hoping to make their organizations more efficient. Yet, rarely do they use the full capabilities or restructure their operations to take advantage of the new technology. Inteck experts can ensure that your getting the most from your technology investment.

### Assessment and Evaluation

Since your hospital uses information technology, often times one will find that it needs to assess what it has before proceeding to invest future dollars for more technology. We have proven experience in evaluating the current status and effectiveness of a healthcare organization's existing systems and providing a roadmap to direct its future course for information technology.

## Strategic and Tactical IT Planning

Planning should guide all IT investment decisions. Inteck's services will assess your current systems as well as provide a road map for future IT investments. After an assessment is the perfect time for Inteck to assist your hospital with its IT plan.

## System Implementation

Once there is a strategic IT plan, it is then critical to select the right system and ensure that it is implemented to maximize operational efficiency. Inteck offers a proven, comprehensive set of services that will enable your hospital to formulate its goals and objectives, select the right IT solution, and implement it in the most effective method for your hospital.

## Facility Management and Outsourcing

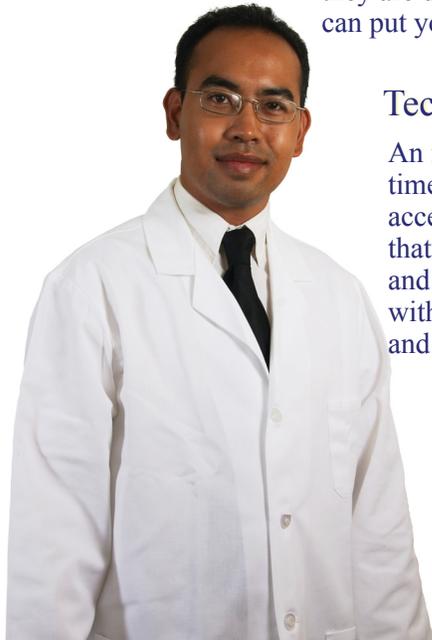

Acquiring and retaining qualified information technology experts remains a significant challenge for all in healthcare management. Partnering with a company that specializes in hospital information technology enables your hospital to focus on its primary concern: providing high-quality healthcare to its patients and clients.

## Financial Management Services

Healthcare Institutions must insure that their operations throughout the entire organization optimize Revenue Recognition and Cash Flow. This requires the right technology combined with implementation of a strategic plan, efficient and effective operations, appropriate technology deployment and ongoing support and education. Inteck's Revenue Cycle Management Program aids hospitals in increasing revenue, improving cash received, minimizing the use of paper in the process, utilizing the IT Systems Effectively and establishes the foundation for the implementation of an Electronic Medical Record System.

## Electronic Medical Record (EMR)

Information technology plays a pivotal role in helping patient caregivers provide improved, efficient and quality care, minimize patient errors and eliminate medication errors. Most hospitals have included the development of EMR as one of their business initiatives, but they are determining the implementation as a challenging and complex project. Inteck can put you on the path to a successful EMR implementation.

## Technology Services

An increasing responsibility of IT is responsible to provide efficient (instant response time) and reliable (no downtime) systems for clinicians which will enable them to access patient information from wherever they are. Hospitals require an infrastructure that is scalable (can be added onto easily), provides high-speed, is always accessible and secure (complies with HIPAA) and connects with all of the different IT systems within the hospital. Inteck can help your hospital insure it has the proper infrastructure and interoperability designed specifically for your organization.

## MEDITECH Specific Services

MEDITECH is one of the leading full-product hospital vendors. Our services complement MEDITECH's products and help ensure that a healthcare organization will implement the MEDITECH system effectively, upgrade it so it can take advantage of new capabilities offered by MEDITECH, and use the system to obtain the greatest benefits possible.

## INTECK, Inc.
