NFV Healthcare Group and Inteck, Inc. Join to Streamline Patient Eligibility Determination and Improve Account Management

DENVER, COLORADO, January 15, 2009. Inteck, Inc. today announces they will make available to their clients NFV Healthcare Group's H.E.A.R.T. software. This proven account management software streamlines the determination process of patient Medicaid eligibility and successfully manages this difficult patient class.

NFV Healthcare Group's Healthcare Entitlement Assistance Recovery Track (H.E.A.R.T.) software allows healthcare facilities to quickly optimize their revenue cycle through eligibility determination and financial management. Inteck will provide the necessary support to insure hospitals use this stellar software to improve their revenue and cash collection.

As the uninsured and underinsured patient population increases, so are healthcare bad debts and charity care. As a result, healthcare Institutions must insure that their operations throughout the entire organization optimize revenue recognition and cash flow. More and more facilities are seeing the increased demand for revenue cycle management due to this increase in challenges associated with reducing debt. Some are calling for more regulations on healthcare debts to avert the millions that are lost each year.

"Inteck is dedicated to serving our clients with expertise and providing solutions to match their needs, so objectives can be met. This partnership underscores that dedication as well as our commitment to the healthcare industry to provide sound solutions to increase cash collection," stated Donald Jacobs, President, Inteck, Inc.

H.E.A.R.T. software is becoming known to many healthcare executives as they search for solutions to the revenue cycle challenges they face. Executives realize the need for an eligibility solution that can maximize reimbursement from limited resources. NFV benefits healthcare facilities by providing alternatives to the typical eligibility approach. Driven by H.E.A.R.T., NFV offers three unique eligibility alternative services: Traditional, In-Source, and Turn-Key.

"NFV is committed to providing innovative eligibility solutions by offering creative alternatives for healthcare facilities facing the increasing challenges when it comes to revenue cycle reimbursement and patient eligibility. A highly successful eligibility program remains a hands on process. Through this partnership NFV can extend our reach and increase patient eligibility," comments Jerry W. "Rusty" Ingalls, President, NFV Healthcare Group.

About Inteck:
